

Nov 12, 2019 In case you use Origin with EA: In case you use Origin with EA games like Sims 4, Need for Speed, Total War etc you can always get Origin to work offline. I am not saying this is the only or best solution but it is the only one that works for me. Enable 'Always Connect to the Internet' in Origin's preferences and open Origin once a day and it will update your EA games in your offline cache. This will only work in Origin though. In case you do not use Origin like I do, then you need to do this instead: In the Origin menu click 'Clean Cache', wait a while, open Origin and close everything. Then click the 'Update Content' button and wait until EA checks for updates and then it will reload the games in your cache. Tested by myself with Sim 4 and Need For Speed. In the case of Sims 4, you can even turn off the Origin login and turn it back on again if you want to play offline. (thanks to Zach and Shablise's advice) In the case of Need For Speed, just click the Offline button and switch to Offline mode. You can find the settings under 'Play' in the top bar. Suitably the same thing applies to Origin, if you can't find it you can ask on the same forum links. Sims 4 Origin no-origin-fix Aug 7, 2019 The reason why all those who have it - and want it fixed or play without it - are wanting to fix or play without it is because the "engine" of Origin acts as an add-on

Oct 26, 2020 Go to your game folder, and open the file named "Launcher.exe". That will open a list of all the games and apps on the system. Simply uncheck Origin, then check the box that says "Select all" and click OK. The Origin Launcher, which automatically adds the game(s) you install, will do the rest. The launcher will overwrite any existing installation of Origin or EA, so you don't need to worry about losing your Steam wallet.
