May 5, 2552 B.C. - Windows 7 Release Candidate Build 7100 is now available for public download directly from Microsoft. In parallel, users can also access .NET 4.6 on their computers. In mid-2014, Microsoft released the first set of updates for Windows 7 after its release, followed by a second set of updates in mid-March 2015. However, it remained unavailable for download through Windows Update. In November 2014, Microsoft began distributing the Windows 7 Creators Update to Windows 7 users on computers preinstalled with Windows 7 based on Windows 8.1.
