While the box proudly proclaims the start of a “new genre” – the War game – in reality, it’s the arrival of a new breed of Yakuza-style third-person action game: the War game, except in real life! The World of SuperEpic The year is 2099. The government has declared a “War Game”: a nationwide contest to see who can inflict the most damage on their foes. Players, chosen at random, gather in cities across the country to fight in this 24-hour cycle of death and chaos, except that you’re actually shooting each other! What started as an alternative reality game is now a full blown commercial franchise, with players purchasing stickers of their favourite national flag to be displayed in-game. The playerbase continues to grow, despite an occasionally bizarre narrative, with Stickers now topping the charts in terms of revenue for the game. The powers that be are desperate to fund their latest scheme – the creation of an experimental virtual reality game, no longer a world of fantasy, but a place that can be controlled and manipulated in the real world, live and in-person. The end result is the Army Entertainment War (AEW), a 64-player battle royale-style “War Game” designed to show just how far the nation’s military capabilities can be pushed. You are S.U.D.O, a star player in the AEW, and the designated leader for this year’s war game. In S.U.D.O., you command a squad of five players, each complete with unique skills and special abilities. But if one of your teammates is killed, all your knowledge and experience are gone forever, leaving you left adrift in a new world. When your squad leader, Ronny, dies in the opening phases of the game, the choices you make will determine whether you are able to rally together a cohesive unit, or if you continue to split into factions. Experience the harsh real-life consequences of human conflict. It’s up to you to make the right decisions, and define your role in this high-pressure War Game. Game Features *Survive and Stay Safe: Blast your way through the battlefield to collect resources that you can trade or sell to gain weaponry and armor. If you’re caught in a police raid, your entire stash will be

This game will not feature the anime voice-acting (as they are not yet completed), but you can play with the English voice-acting if that's what you like. Although this game includes a ton of DLC, as of now it

doesn't include any of the new commercial ads, or "Captain's Logs" content, but those will be included in the next update. Change Logs (always at the bottom of each page): Check the update notes page for any updates/ changes to the game. Game Idea Edit: The game was originally supposed to be released on September 28th, 2017, but it was delayed due to the delay of One Piece Chapter 892 Chapter Name Locked: The Tyrant's Watch. The game took a LOT of tweaking to get it perfect. I would like to say thank you to all the community, who helped me alot in the process, and also to the moderators of the One Piece Universe. The game includes more than 50 DLC, each of which are purchasable in the game. The DLCs are completely optional and the game is still playable without any DLCs. Currently, all 9 DLC's are unlocked (4 DLC's in Chapter 1 and 5 DLC's in Chapter 2). For Chapter 2, the Japanese voice-acting DLCs will be released on November 27th, 2017, the English voice-acting DLCs will be released on January 10, 2018. How to play: The game is very easy to play and you shouldn't have any difficulty. In the character select, you will be able to choose from 9 different characters, each of which has a different role in battle. Since the game is split into 3 different chapters, I have divided it up into three different guides, so they are easier to follow. Chapter 1: A New Day Has Come -Tsubaki -Not Yet Completed Chapter 2: Perfume Friends -Nami -Not Yet Completed Chapter 3: The Dressrosa Chapter -Franky -Not Yet Completed The game will be updated semi-regularly so the guide will be up to date. Character Select Edit: The character select menu is very easy to navigate. From the character select menu, you will be able to choose one of three characters, each of which has their own advantages and disadvantages. Tsub c9d1549cdd
