What's New In?

The F-Bagle is a utility for disinfecting computer systems infected with the Bagle worm or the Mitglieder virus. The infected systems are those which had a recent login to the Internet or the Microsoft Network as a result of the Bagle worm or the Mitglieder virus. The F-Bagle also removes a new variant of the Bagle worm that can infect Microsoft Windows 95. It also removes an old variant of the Bagle worm that has a 3.1485KB payload and does not spread to other systems. It also removes the new Bagle.N variant which has a 3.1485KB payload and spreads to other computers by using a user account of a computer administrator to avoid detection by antivirus programs. The F-Bagle utility will disinfect any system infected by the Bagle worm, Mitglieder virus and email-worm.Win32.Bagle.ba variants. It will also remove a new variant of the Bagle worm that infects Microsoft Windows 95. However, it will NOT disinfect Bagle.N, Bagle.Q, Bagle.P, Bagle.R, Bagle.S and Bagle.T variants because their viral component is polymorphic and cannot be detected by antivirus programs. The disinfection procedure is discussed below: ⬜ Unpack the F-Bagle utility from the provided ZIP archive ⬜ Close all running applications and run the unpacked F-Bagle.exe file from a hard disk to eliminate the infection. You can run the utility by either doubleclicking on it from Windows Explorer or you can start it from a command interpreter (COMMAND.COM or CMD.EXE) by typing its name at command prompt and pressing 'Enter' (for advanced users). ⬜ First the F-Bagle utility will kill Bagle worm's and Mitglieder virus's processes in memory. Then the utility will remove Registry entries created by the worm. Finally the utility will scan all hard drives for infected files and delete them. ⬜ Restart a computer. After restart your system should be clean. F-Bagle Features: The following features are provided by the F-Bagle utility: ⬜ Clean all user files from infected system ⬜ Remove worm's and Trojan files from hard disk drives ⬜ Remove any dropped files from a disk ⬜ Remove Registry entries created by the worm ◆
