Basic life support (BLS) is the first step in the resuscitation of an unconscious patient in the field. It is the first aid of first aid. It is designed to provide the assistance an untrained person would need to stop bleeding or to provide respiration. A form of basic resuscitation program was introduced into the curriculum of undergraduate paramedic students with the aim of improving the knowledge of this subject and thereby optimizing BLS practice in the curriculum. The program included didactic teaching and practice drills in the preclinical years of the course. The essential components of basic resuscitation practice were introduced and implemented in the clinical years of the course. An assessment consisting of pre and post course questions was 0cc13bf012
