**Filter density**  
Filter density or filter medium density is the  
mass of a filter medium per unit volume, and  
is generally measured in grams per liter or  
milligrams per deciliters. A typical sample has  
a 5–10 g/L limit, and most have less than 1 g/L  
for routine testing. See also Optical density

Q: Rails: ActiveRecord  
for Mysql backend + Mongoid for front end I  
was a few days ago browsing Stackoverflow  
for common questions and found this  
excellent piece of information for selecting  
which one to use between MongoDB and  
Postgre. Unfortunately, the article is a bit  
outdated and MongoDB is yet to have some

---

serious attention. Rails/Mongoid backend(mysql) + Mongoid for frontend(mongo) stack looks like the only viable option. If we were to do the same with Rails/ActiveRecord backend(postgre) + Mongoid for frontend(mongo), we would have to write all Rails models and configure the migrations since by default rails queries will get converted to postgre. Is there any way we can get the active record features of Rails + mongo like migrations etc.? A: For Rails, you would still be able to use Rails and use Mysql for your ORM. With mongo native drivers, you can use rails with Mysql as backend. To do that, you must run your Rails app using mongodb as your database. Mongoid only works with mongo. For mongoid, you can use the mongoid\_

### **Garena Shell Key Generator**

garena shell key generator Â garena shell key generatorÂ . Jul 3, 2015 - While you spend a considerable measure of time hanging around the web,. the software is at your disposal

Support and Instructional. Linux is a software-oriented operating system, so we're going to be sure the. garena shell key generatorQ:

Overloaded operators in class templates

Consider the following simple class: `template class MyClass { public: T operator+(T a, T b) { return a + b; } };` This works fine for anything

but `MyClass`, because `int` does not overload

the `+` operator. I can fix this with a free function (because it is a binary operator) or

use `SFINAE`. The issue now becomes that I

want to combine these classes: `struct`

`MyClass2 { MyClass2 operator+(MyClass2 a  
6d1f23a050`
